

Ultra-fast, lab-quality, PCR test to improve pandemic management

15 minute COVID-19 PCR Test

Innovation

Silicon chip technology allowing for ultra-fast PCR

Quality

Built-in controls ensure the highest quality result

Speed

<15 minutes turnaround time

Scalability

Both testcard (disposable) and reader are highly scalable

Specificity

PCR designs cover variants of concern

Workflow

Optimized to reduce hands-on time and enabling high throughput

Sensitivity

Proven sensitivity equal to reference lab-based PCR

Versatility

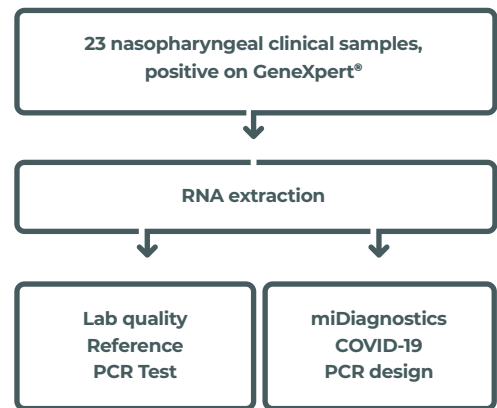

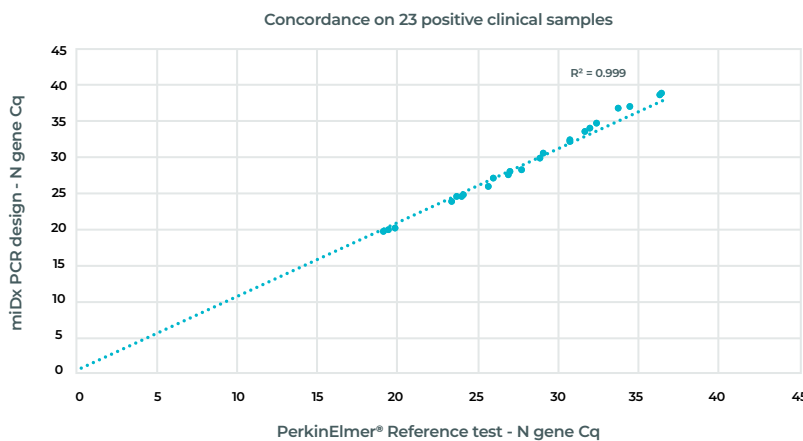

Easy menu expansion for other infectious diseases (e.g. Flu, RSV)

Prototype. Not for diagnostic use.

Lab-quality PCR performance

Data with miDiagnostics and PerkinElmer® COVID-19 PCR design

100% concordance
